USING A REUSABLE WATER BOTTLE

Bottling water takes a huge toll on our environment. Bottling water releases 2.5 million tons of carbon dioxide into the atmosphere annually and takes 17 million barrels of oil to produce a year’s supply. That’s enough oil to fuel 1.3 million cars for the year or power 190,000 homes! 38 billion water bottles end up in landfills each year. You may think that buying disposable water bottles and recycling them evens out the devastation they cause, but that is simply not the truth. 90% of the cost and eco emissions of bottling water come out of the creation of the bottle itself. Using a reusable water bottle lowers the amount of waste in landfills, protects animals and marine life and saves you hundreds of dollars a year.

+ + + + + + + + + + +

Between now and September 30, the BC provincial government is taking public input regarding plastic waste. They have apparently said they will only take action if the public supports it. You can make your thoughts known at the link below. The survey takes about 10 minutes.

MIGRATION PILGRIMAGES

We are in the midst of a great migration season, when millions of creatures are on the move. Every year, as a spiritual practice, Louise Cummings goes to different places around the lower mainland to witness the migration of various species – the shorebirds, then the salmon, snow geese and eagles. Right now, shorebirds are travelling long distances from northern BC and Alaska to warmer climates in the south. They rest and feed in Boundary Bay. Louise invites you to join her on [Sunday, September 22nd at 1 pm](#) to walk on the dyke at **104 St and Ladner Trunk Road**. Bring binoculars if you have them. Any questions to Louise Cummings (louizecummings@yahoo.ca, 604-652-1090)

☞ Please note that **Rev. Lori Megley-Best** will be away this week. She will be back on Sunday, September 29th. Please contact **Rev. In Lee** for any pastoral emergencies. (778-953-3775, leein1109@gmail.com)
